# Parcel verification report

A guide to the two measures used in this report.

## Checked parcels

A check is recorded when a parcel label is inspected at intake.

The intake register lists the count for each receiving depot.

## Completed parcels

A completion is recorded when a dispatch run is closed.

The dispatch chart shows counts for the outbound depots.

## Reading the counts

The two lists cover different operations and depot groups.

Read each count from the corresponding table or figure.

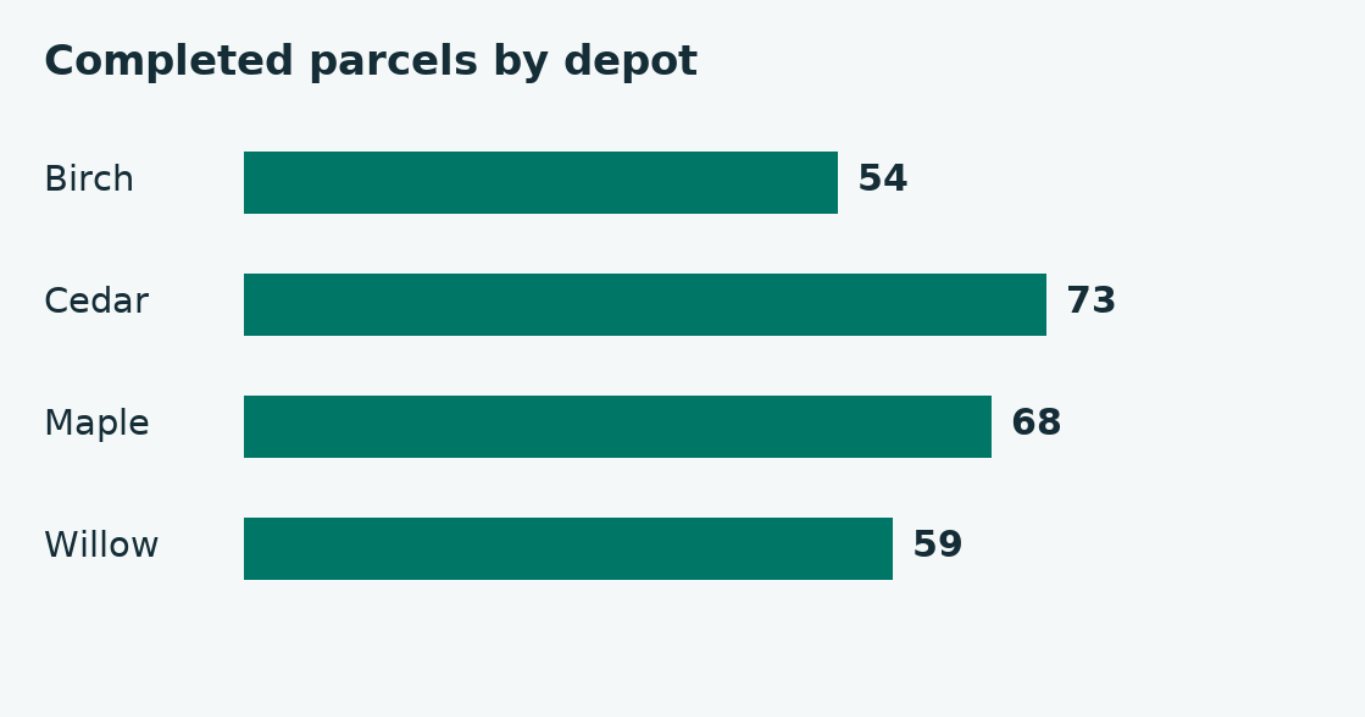

# Intake register

Checked parcels by receiving depot, in parcels.

| Receiving depot | Checked parcels |
|---|---|
| Alder | **36** |
| Harbor | **47** |
| Linden | **52** |
| Vale | **65** |

# Dispatch chart

Completed parcels by outbound depot, in parcels.

Each bar label gives the number of parcels for one outbound depot.
